For February's open day on Sunday 23<sup>rd</sup> we aired the new sign for the first time. It was much admired and drew some very positive comments. The stand just needs a second coat of paint and it will be ready to go on the road accompanying the cockpits to shows.

This BC348 radio receiver is part of a package of crash site items rescued from the Lancashire moors and donated to TAC by Mick Wheatley of Darwin Lancashire.

This is the DH Dove propeller assly on display in hut 27 at Hooton Park, Jon Howard has recently negotiated with HPT for TAC to take ownership and responsibility for it.

The outer wings sections from our Vampire arrived at Hooton park on Thursday 20<sup>th</sup> February.

Jon Howard believes he has a buyer for these at £1,000 which we hope will fund buying a pair of undamaged complete wings.

Arriving from Solway on Sunday 2<sup>nd</sup> February was this incomplete Avro Lincoln nose glazing frame. It needs about six lengths of tubing to complete it and Avro heritage have shown an interest in taking it on loan.

Two more items to come from Darwin are the Link Trainer instrument panel and the P.51 Mustang propeller blade
