Dicko's photo shows I guess Avian EBZM where ? Stockport ? Malcolm on the left John K in white shirt and tie and Paul Connatty in the cockpit but who are the other five ?

This photo shows the far right hand corner of the floor in hut 28, Stewart and I have removed the Badly damaged concrete and several inches of ash and earth. Rubble is being used as a base followed by a mixture of sharp sand and stone, this will be followed by five inches of concrete. The old floor was just two inches of a very sandy looking mix, this and the roof of the annex are our priority projects this summer.

These three photos show typical damage to the pillars and walls above the annex on hangar one and are the cause of the water entering the building, hopefully we will have some decent weather this summer enabling us to carry out repairs.

Two pictures from Old Warden taken during the September Air Show 2012, the Bristol Boxkite above and below the Avro Triplane, imagine making and fitting all those wires !!
